Sabaf has received the **Best Managed Companies Italia 2019** award by **Deloitte**, one of the world's leading companies in consulting and auditing services. The award, now in its second edition in Italy, was established by Deloitte in Canada in 1993 and since then has awarded over 1,200 companies worldwide, establishing itself as a brand of solidity and excellence in business organisation. The award was decided by an independent jury, composed of authoritative representatives of the Italian entrepreneurial, academic and institutional world, which considered **six parameters: strategy; expertise and innovation; corporate social responsibility; corporate culture and commitment; governance and performance measure; internationalisation**. Deloitte's initiative is supported by ALTIS Università Cattolica, ELITE (the London Stock Exchange Group's programme that supports the development and growth of high potential companies) and Confindustria. "The award given by Deloitte is particularly satisfying because it is the result of an overall survey of our company based not only on numerical parameters, but also on the analysis of the strategy, the governance model and the involvement of all categories of stakeholders – Pietro Iotti, Chief Executive Officer of Sabaf, said -. This award is for the work of the entire organisation, encouraging us to continue along the path of growth that we have outlined".
